

# Emergency Rail Car Service Recovery

**What would you do if your freight's anticipated arrival was threatened?**

*One call to UPDS Carrier Services activates a transload team anywhere in North America. We will recover your freight from the rail car, send it to a final destination, and keep your supply chain running as planned.*

## Logistics Expertise

UPDS Carrier Services provides emergency rail car service recovery as a component of our comprehensive logistics solutions. Supported by a team of 24 x 7 logistics experts utilizing relationships with a carrier network of over 400 trucking companies, customers can be assured Carrier Services meets their emergency rail recovery needs with innovative solutions.

## Competitive Advantage

Consider the benefits of using Carrier Services:

### Rapid Deployment:

Within two hours of receiving your call, Carrier Services will deploy a transload team equipped with the necessary resources to meet your specific needs. In most cases, the team can be on site within five hours. A warehouse or dock is not required – just arrange for the rail car to be stopped in a safe location and Carrier Services will do the rest.

### Fully-Coordinated Service:

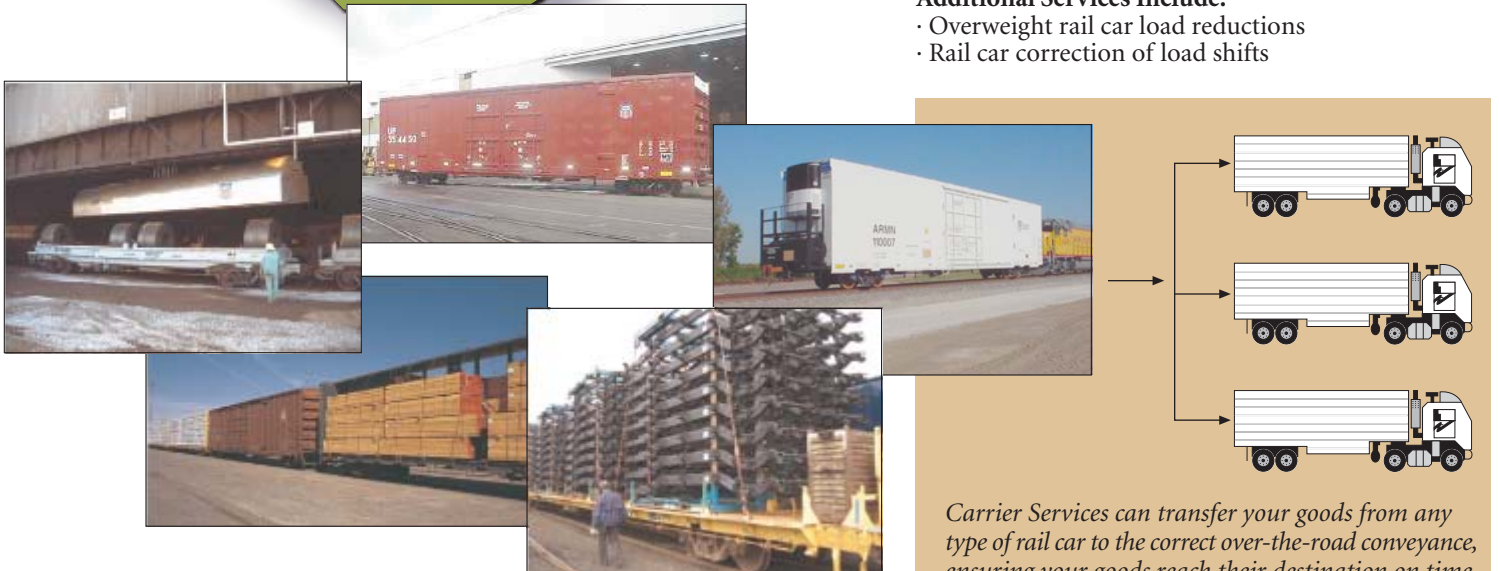

By matching the correct number, size and type of trucks required for the job, we will ensure the right equipment is deployed to meet your needs. Carrier Services has access to an extensive supply of dry vans, reefers and flatbeds.

### Proven Experience:

We serve a diverse group of shippers and receivers, with commodities including auto parts, auto chassis, steel coils, food products and lumber. Our customers range from auto manufacturers to small volume rail customers. Recovery service can be performed anywhere, on any railroad from large Class 1 Railroads to the smallest short lines.

### Additional Services Include:

- Overweight rail car load reductions
- Rail car correction of load shifts

Equipment (clockwise, left to right): Coil Steel Car, Boxcar, Refrigerated Car, Flat Car, Centerbeam
